also include the concept of three 'R's "Reduce Reuse and Recycle". As per the International Chambers of Commerce (ICC) in its publication of Environmental Auditing (1989). The ICC defines Environmental Auditing as: "A management tool comprising a systematic, documented, periodic and objective evaluation of how well environmental organization, management and equipment are performing with the aim of safeguarding the environment and natural resources in its operations/projects."

3. Introduction

In 1962 Rachel Carson wrote Silent "Spring" the book which focused on the indiscriminate use and the harmful effects of chemical pesticides on birds incepted the need of the use of practices not harming the environment apart from the other common factors of pollutions viz air, sound and water. It caused Global environment consciousness and later on in 1969, Congress recognized the importance of the issue and passed the National Environmental Policy Act (NEPA). In 1980s Environment Protection Agency (EPA) was formed to protect human health and environment. With time while protecting environment through EPA which focused mainly to clean up the pollutants/toxins a parallel process started to reduce the use of toxic substances and reuse the products which are made from environmental resources. Thereby in one hand the objective became to stop using materials or stop adopting processes those were causing pollution and start an alternate path that used environment friendly materials or did not create a non-biodegradable waste and that used less energy or carbon foot print. Subsequently, for any organization or institute it became important that it adopts processes that do not individually or collectively make a negative impact upon the environment and help in maintaining "the Green concept" and contributing as much as it can. Thus, an audit becomes indispensable to understand where an institute or organization needs to improve in earning green points. With the inception of the subjects like Environmental Sciences and Green Chemistry that target to teach sustainability for every responsible institution or organization Green Audit has now become an integral part of management process. A Green Audit is thus a method of gathering data about an organization that offers a realistic evaluation of the actions the organization takes to safeguard the environment. Well-developed environmental objectives and targets should be implemented in order to limit the negative consequences to a greater extent in order to preserve the environmentally friendly atmosphere of an organization. It can spread environmental awareness, ethical standards, and

a sense of environmental responsibility. It helps employees and students understand the effects of going green on campus.

4. Overview of the Institute

Falakata College, recognised by UGC under 2f and 12B was established on 19th September 1981 as an undergraduate College. This is a grant-in aid college affiliated to the University of North Bengal. The College has around 6.38 acres of land Alipurduar district, West Bengal and this is a co-educational institution. The college has been accredited at the B+ level by the executive committee of NAAC (National Assessment and Accreditation Council) on October 30, 2017. The Institution endeavours to facilitate opportunities for educational empowerment capacity building through promotion of quality education and promote moral, social and human values to become catalyst of social transformation and justice. The College was established with a mission of spreading higher education among the under privileged class and rural community. The college provides undergraduate programme under faculties - Arts, Environmental studies and Sciences. The B.A programme covers Honours in Bengali, English, History, Geography, Political Science, Philosophy Sanskrit, Education. B.Sc. Honours covers Honours in Geography only. Besides, there are 10 General stream subjects in Bengali, English, Economics, Geography, History, Political Science, Philosophy, Physical Education. These subjects enable students for competitive examinations and nurture the cultural heritage as well. The college follows a transparent online system of admission on the basis of merit.

The College has some extension activities of Community Development, Health and Hygiene Awareness, Medical Camp, Adult education and awareness, AIDS awareness, especially through NCC and NSS wings of the College. Meritorious and poor students are given financial assistance out of poor funds students from the ST, SC & OBC communities are given State Govt. stipends. Below Poverty Line students are also given financial assistance out of welfare fund. The College promotes Cultural activities amongst students, The College publishes annual magazine. The College holds Counselling sessions in collaboration with different organizations on the issues of Drug addiction, etc. The library has been computerized and is well equipped. The college has Career Counselling Cell, Anti-Ragging Squad and Gender cell.

5. Aims and Objective of the Institute

The Institution endeavours to facilitate opportunities for educational empowerment and capacity building through promotion of quality education and promote moral, social and human values to become catalyst of social transformation and justice.

- To promote academic excellence.
- To include a civic sense with ethical, moral and social values in students and help them to grow into good citizen.
- To empower students to lead productive lives and become agents Of social economic change of the community.
- To provide education among students of lower economic strata.
- To provide quality and value based higher education irrespective of caste and community.
- To provide the supports for the excellence in sports and cultural activities.
- To make the campus eco-friendly and also to make the community aware of preservation of natural resources.
- To provide community service through an active NSS unit.
- To make the campus ragging free.
- To provide oxygen and reduce pollution through plantation drives inside and outside the campus
- To adopt sustainable practices and inculcate the same among the students
- In everyday activities to focus on three R factors: Reduce, Reuse and Recycle
- To go more on waste management and enter the society an eco-friendly campus.

6. Infrastructure of the Institute

Classrooms: Our College has 30 Classrooms and equipment like projection facilities in the classrooms and smart classroom. Regular maintenance of computer equipment is done by concerned teachers, lab-assistants and lab attendants. Laboratory: The College has laboratory facilities for lab-based subjects for Geography. The laboratory is managed by the respective Laboratory Attendant under the supervision of the Head of the Departments. Library: The

library is adequately equipped with text and reference books. All library information about books is available online. Library is equipped with the CCTV cameras for overall monitoring and surveillance. All the Staff Members can access the Library facilities and can borrow books, Magazines, periodicals, Inlibnet facility and has membership in American Library, British Library NLIST and other materials as per the rules for each category. Annual physical verification of Stock is conducted through Library audit.

IT Infrastructure: The College is gradually moving towards complete online facilities in e-governance such as Admission, Accounts, and Fee Collection etc. During the pandemic entire teaching-learning and internal assessment has been done online. The Under Graduate Semester End Examinations have been conducted online. Classes were held online with the help of Google Meet and Google Classroom.

The institute provides sports facilities for students. Indoor games including table tennis, carrom, chess badminton is available on campus. Outdoor games like football, volleyball, kho-kho, kabaddi, badminton, and other athletic sports like shot put, javelin, high jump, long jump, running race are regularly conducted throughout the year. The maintenance of sports ground and equipment at the college is carried out by Physical education department and the Sports Committee. Regular inspection is done to check the ground/sports related equipment and take appropriate measures.

Total number of computers the institute has is 46 and high-performance advanced printers are 2. The entire campus is under CCTV surveillance which includes 48 cameras.

The college caters to the educational needs of the large number of students hailing from Tea Garden and Rural areas. The infrastructure facilities such as classrooms, laboratories, library, and common room facilities for both boys and girls are provided. There are also facilities for indoor and outdoor games. The college has a systematic mechanism of maintenance and upgrade of physical, academic, and support facilities. The departmental heads place academic requirements like books and journals, IT facilities, organizing special lectures, seminars or workshops demands along with the approximate budgets to the Principal. The Principal places the requisition in the meetings of the Governing Body, Finance Committee, Library Committee, or any other relevant committee. Financial rules of the government are strictly followed for all purchases. The conditions of the classrooms and the furniture provided for the student in the classrooms are regularly monitored. The office maintains a register for complaints, repair etc. of all facilities like furniture, electrical work, generator,

Solid Waste:

We are trying to work with minimum papers, mostly working with the soft copies and PDF. The waste papers, however, are used for rough works as much as we can and / or used as fuel in hand made oven (Chulha) to make daily refreshment. The rest of the non-biodegradable wastes like rugged board markers and ink bottles are packed and put into non-biodegradable waste bins. The wooden damaged/ old outdated items are recycled by reconstructing into different models and at the most when nothing can be done, in case of broken wooden materials, those are used as fuels to cook during social / cultural gathering when lunch is arranged (could not be possible much during pandemic). Solid canteen waste (mainly food stuffs) is decomposed and the compost is used for gardening inside the campus.

Liquid Waste:

We don't have a management system to deal with liquid waste inside our college especially the chemicals. However, all the Department always encourages students and the teachers to follow the guidelines designed by the Department itself:

- Preferring to work in micro scale and thereby avoiding excess chemicals and reagents.
- Avoiding the experiments dealing with highly toxic and carcinogenic chemicals.
- In preparations and synthesis wherever the use of organic solvents is unavoidable, the solvents used are relatively nontoxic and it is distilled to recycle and reuse

Energy saved 2022-2023: 20225376000 Joules

11. Water conservation

Usage: The institute uses water mainly for Drinking, Cooking (in canteen), Toilet purpose and in Gardening. Nearly 15000 litres of water is used of which a major fraction of drinking water is supplied by Government which is further purified with UV/ RO treatment and served to the students and the staff members.

Recycling and utilization of rain water: The harvesting of rain water have been in practice beside the herbal garden. During rainy season 3000 L tanks are used to collect rain water coming from the top roof above the English department. Any type of misuse of water are prevented and it is made sure that there is no water loss through faulty pipeline.

12. Air Quality

The campus is nearly one kilometre away from the main town and is enriched by green high density leafy trees. The combination of these keeps the campus away from air and sound pollution. The rooms are spacious and airy with sufficient natural day light. The campus provides a good amount of oxygen to its nearby habitat and acts as a screen for carbon

| Sl No | Questionnaires | Answer |
|-------|---|---|
| 05 | Celebration of World Environment Day, Earth Day, and Ozone Day | Yes NSS team is actively engaged World Environment Day is observed on 5th June. Earth Day is observed on 22nd April. World Water Day is observed on 22nd March National Youth Day is observed on 12th Jan |
| 06 | Recognition/Certification of Environment Friendliness of the Campus | Yes By the University of North Bengal |
| 07 | Any Renewable Sources inside the campus | Yes Solar energy assisted high focusing lights to lit the campus. |
| 08 | Does the Institute conduct Green audit or Energy audit of its campus? | Yes. |
| 09 | NABL, NABET, TOPM accreditation | No |
| 10 | NAAC accreditation | Yes, at 2017. 1 st cycle |

16. Recommendation or the Team

- A medicinal plant hub should be created with all plants of medicinal importance
- Plant ownership programs should be introduced in the institute
- Biodiversity Club has to establish to ensure proper permission of student in keeping the campus green.
- Water usages meter have to install to monitor water usages and wastages.
- A regular air quality monitoring program needed to keep track of everyday air quality.

- Increase in Environmental promotional activities for spreading awareness at campus.
- Star rated ceiling fans to be installed
- Rooftop solar panels to be installed to cover electrical energy usage
- More roof top trusting shed to be done to harvest more rain water.

17 Environment Awareness Campaign

An Environment Awareness Campaign was organized by Falakata College to make the students aware about the need to protect the biodiversity and a special emphasis was given on the clean and green campus initiative where the students of the College hold placard by demonstrating the ideas including save water, electricity, methods of waste management and the need to plant more trees to make the environment greener in and around the campus. This environment awareness campaign included a visit to the nearby locality and to the Parangarpar Sishu Kalyan High School, Falakata, where the students of the school were instructed to follow the means of energy conservation and the ways to protect the environment. Sudarshan Das, a faculty from the Department of Geography elaborately talked on this campaign and drew the attention of the school students towards environment awareness measures. In brief he addressed the issues towards the need of energy conservation and saving valuable natural resources while focusing on the need to discard degradable and non-degradable waste in separate dustbins. The main agenda of the programme was to initiate a clean and green campus thereby making the students aware of the needs associated with it. The students of our college interacted with the school students and presented the need to maintain a cleaner environment. The basic approach was to instill in the young minds the dire need to conserve nature from human exploitation and save the environment. One of the major agenda for this campaign was to increase the biodiversity in the college campus. This campaign initiated an environmental consciousness amongst the students which provided impetus to their future environmental programmes. Dr. Pradip Adhikari, Assistant Professor from the Department of History, Falakata College corresponded with the students of the school and emphasized on this ecological concern and the ways to address those. The campaign concluded with some remarks and observations of the Headmaster of the Parangarpar High School.
